EXPERIENCE

Lead Product Designer, Athos Commerce

Nov 2023 - Present

As the sole Design Lead for the Athos Console, I spearheaded the end-to-end UX/UI redesign of a 20-year legacy platform, successfully modernizing the interface while preserving critical feature familiarity for the existing user base. I architected and deployed a comprehensive design system from scratch using Material UI (MUI), creating a scalable infrastructure that increased development velocity and seamlessly withstood a major corporate rebranding mid-rewrite. Beyond technical execution, I managed global stakeholder relationships and collaborated with cross-functional teams worldwide, advocating for user-centric improvements and negotiating experience trade-offs to ensure design alignment with complex business goals in a fast-paced, adaptive environment.

Mid-Level → Senior Product Designer, Ateliware

July 2021 - Nov 2023

In a fast-paced agency environment, I collaborated within a team of six designers to deliver diverse products ranging from mining surveillance systems to educational platforms. I founded the company's game design division, securing educational credits for the team to expand our technical capabilities and was promoted to Senior Designer after consistently leading high-stakes projects. Throughout my tenure, I managed the end-to-end design process for a variety of complex applications, including a gamified resource management tool and an educational game for children, while balancing client expectations and mentoring junior designers in a lead-and-support project structure.

Graphic/UI Designer, Freelance

Feb 2018 - July 2021

Partnered with small businesses and startups to deliver end-to-end brand identities and digital products. Managed full-cycle visual media for recurring clients and launched multiple MVPs, including a Bitcoin-integrated sustainable marketplace and a location-based community discovery app. Specialized in translating niche business requirements into functional, scalable user experiences.

Graphic Designer, Mediaweb

Feb 2016 - Nov 2017

Worked as a graphic designer in a marketing agency, creating visual assets for Walmart, Furukawa electric and other companies.

ACTIVITIES

Publications

AI Didn't Kill Creativity. We Handed It Over, 2025

How to empower an organization through design?, 2022

Why every interface looks the same, 2022

Projects

Created a self-organizing notetaking app for busy people, called Blindspot.
